

About Trader Data

- **Most traded coin:**
 - 1) Hype – 32.2%
 - 2) @107 – 14.2%
 - 3) BTC – 12.3%
 - 4) ETH – 5.3%
 - 5) SOL – 5.1%
- **Most Common Direction:**
 - 1) Open Long – 23.6%
 - 2) Close Long – 23.0%
 - 3) Open short – 18.8%
 - 4) Close short – 17.0%
 - 5) Sell – 9.4%
 - 6) Buy – 7.9%
- **Distribution of Side:**
 - 1) Sell – 108528
 - 2) Buy – 102696
- **Average and Total count:**
 - 1) Average trade size (USD) – 5639.45
 - 2) Average Profit and Loss – 48.75
 - 3) Total Profit and Loss – 135329.09
 - 4) Total fees – 837.47
- **Most common trade size - 1000 USD (10^3) almost 30,000 traders.**
- **Majority of the Profit and Loss lie between 1 - 100 USD**

About Sentiment Data

- **Distribution of Sentiment:**
 - 1) Fear – 29.5%
 - 2) Greed – 23.9%
 - 3) Extreme Fear – 19.2%
 - 4) Neutral – 15.0%
 - 5) Extreme Greed – 12.3%

Relation of both Tables

- **Profitability**

- 1) **Extreme Greed has the highest average profit per trade (67.89):** Traders do better in bullish market.
- 2) **Extreme Fear & Neutral both have low average PnL:** Suggesting cautious behavior.
- 3) **Total PnL is highest in fear (3.35M):** Because highest trade happened in fear market.

- **Trade Size**

- 1) **Average trade size is largest in fear (7.8k USD):** Maybe traders try to buy the dip with larger positions.
- 2) **Total traded volume is also highest in fear.**
- 3) **In Extreme Fear, average trade size drops sharply.**

Insight: In fear traders commit more capital but in extreme fear that number shrinks.

- **Fees**

- 1) **Total fees are highest in fear (92k USD):** Maybe due to the higher amount of trades happened in fear market.
- 2) **Mean fees are also largest in fear:** So average trades were costlier in fear than in any other sentiment market.

Insight: Higher trading activity in fear, trades earn more fee in fear market.

- **Trade Count**

- 1) **Most trades occur in Fear (61k) and Greed (50k).**
- 2) **Extreme sentiment days (Extreme Fear/Extreme Greed) have fewer trades, but they still show distinctive patterns.**

Summary

- Traders are most active during Fear phase, taking larger positions and paying higher fees, but their per-trade profitability is lower compared to Extreme Greed.
- Extreme Fear leads to smaller trade sizes and lower profitability, while Extreme Greed is where traders achieve the highest average PnL per trade.
